

I understand that expansion of LPFM threatens my most listened to Radio station, K-LOVE at 94.3

This radio stations serves the public interest by providing positive music that this community desperately needs to hear. I've heard many stories of people whose life had been changed by listening to K-LOVE. I myself often look there for inspiration and encouragement. If this station goes off the air, it would leave a huge void in the north and west parts of Chicago-land. There would be no where a listener could turn to the contemporary and positive music that K-LOVE plays.
